

ifree Login Button Guide

Font follows each service UI font, but ifree notation will only tolerate lowercase letters.
Please apply it in accordance with the guide. All used #24BBEF tolerates blue color only.
Please follow the guide below when applying the buttons.

1. Login button

The login button consists of an icon and an inductive phrase, and the icon ratio cannot be changed.

2. Design specification

Use only the "ifree" icon. The login test follows each service UI font.
Button guidance statements can be changed regardless of Korean or English to the extent that they meet the purpose of 'Login as ifree'.
RGB Color allows only '#24BBEF'."

Size change

The width of the button can be adjusted to optimize the length of the inductive phrase and the application situation. However, the horizontal and vertical ratios of icons (between oilfields) must be maintained

Change and Apply Button Styles

The ifree login button design style can be changed flexibly design to the extent that it does not harm the image unique to the ifree and should have visual effects similar to or similar to the size of the button when exposed with the third-party buttons.
